### Disclaimer

This impact estimate is automatically generated and only takes into account the population affected by flood hazard in Jakarta. The estimate is based on flood hazard data from BPBD DKI Jakarta and population exposure data from the Population Agency, DKI Jakarta Province. Limitations in the estimates of flood hazard and population may result in significant misrepresentation of the on-the-surface situation in the figures shown here. Consequently, decisions should not be made solely on the information presented here and should always be verified with other reliable information sources.
